1. Between 8 a.m. and 2:30 p.m. on 20 November 1953, 29 MiG-15s and 1 Yak-11 were observed at Deutsch Wagram (P 49/S 50) airfield. The sky was 5/10 overcast. After 10 a.m., there was good visibility, an easterly wind of about 8 km/h and a ceiling at an altitude of 1,500 to 2,000 meters. Individual take-offs were made by MiG-15s at 10:15 a.m. One Yak-11 took off at 11 a.m..<sup>1</sup> Trucks  with drivers wearing black-bordered blue epaulets were observed entering and leaving the field.

25X1B

2. At Deutsch Wagram military post, sentries wearing black-bordered blue epaulets were posted at the aircraft repair shops and four gray crates were observed near the installation. The road block in front of building No 28 Jahnhoferstrasse was removed. A small cone-shaped antenna with a disk on top was observed on the roof of the building. Source observed for the first time a knot-like device, similar to a ball joint, on the mast. Two branch cables extended from this knot-like device into the building. A two-section metal rod, of which the upper section was about 20 cm long and the lower section about 10 cm, extended from the top of the pyramid to the center of the basis. Another cone-shaped antenna with a mast, about 8 meters high, and a disk on top was located on the other side of the road opposite the building. No branch lines were observed extending from the antenna. The rod between the top of the pyramid and the center of the basis was painted black and had no gap dividing it into two sections.<sup>2</sup> Source had the impression that the building no longer housed the komendatura previously assumed as being there. There was considerably less traffic by personnel, particularly officers, than noticed previously. No sedans were observed entering or leaving the building which was guarded by sentries wearing black-bordered blue epaulets. At building No 19 on Bahnhofstrasse, cable lead-ins were being removed from the roof. However, there were still numerous telephone cables. The personnel observed there wore black-bordered blue epaulets. No guards were seen and no motor vehicles were observed in the building yard. The garage near the school was large enough for four motor vehicles. A van-like truck and a generator cart were parked in the garden. The noise of a running generator was heard.

Personnel observed wore black-bordered blue epaulets. Truck [ ] 25X1  
 with driver wearing black-bordered blue epaulets twice carried 10 men 25X1B  
 wearing fur-line jackets from the airfield to the school within two  
 hours. Around noon, 35 officers wearing blue service color entered the  
 building No 25 on Haupt Strasse. Truck [ ]  
 with drivers wearing black-bordered blue epaulets were parked in front of  
 the building No 6 to 8 on Fockfliessgasse. A large dump for fire wood  
 and coke (object No 14) was located near building No 42 on Fockfliessgasse. A sentry wearing black-bordered blue epaulets was  
 posted next to the dismantled superstructure of a van-like truck in the  
 dump yard. The motor vehicle parking lot in Deutsch Wagram was guarded  
 by sentries wearing black-bordered blue epaulets. Motor vehicles parked in  
 the parking lot included 21 trucks, 3 van-like trucks, 9 tank trucks and  
 1 truck with a hoisting gear. Vehicular traffic involved trucks [ ] 25X1  
 [ ] all with drivers wearing  
 black-bordered blue epaulets.

3. At Strasshof military post, there was traffic between the officers billets,  
 the airfield and the large building by officers wearing blue service color,  
 including 2 lieutenant colonels and 5 majors. The latter building which  
 was guarded by sentries wearing black-bordered blue epaulets was mostly 25X1B  
 frequented by officers wearing blue service color. Truck [ ] and  
 weapon-carrier [ ] both with drivers wearing black-bordered blue  
 epaulets, were parked on the parking lot in front of the building. Two  
 trucks and a field kitchen were parked in the sheds of the building yard.  
 Four women wearing black-bordered blue epaulets were observed leaving the  
 building and going to the large building. A total of 38 men  
 wearing black-bordered blue epaulets were counted in the area of the can-  
 tonment and truck [ ] was parked there. Four van-like trucks,  
 5 tank trucks and 16 trucks were parked in the camp on the edge of the  
 woods, while truck [ ] left the camp.

4. Between 2 p.m. and 4:30 p.m. on 20 November, 2 Yak-11s and 23 MiG-15s  
 were observed at Deutsch Wagram airfield. Source could not observe the  
 eastern section of the field. There was a C/10 overcast, a visibility  
 range of about 15 km, and no wind. MiG-15s were observed taking off indi-  
 vidualy and in elements of twos. The take-offs and landings were made in  
 a southwest-northeast direction. In addition to the previously reported  
 western row of searchlights, source observed for the first time a new row  
 of searchlights which extended parallel to, and southwest of, the runway.  
 This new row of searchlights consisted of ten white lights from northwest  
 to southeast and a red searchlight which was approximately the same size  
 as the searchlight at Wiener Neustadt (O 48/X 34) airfield. The western  
 row of searchlights was not in operation.  
 The AA gun emplacements were neither occupied nor guarded and no motor 25X1B  
 vehicles were observed nearby. Motor vehicles observed moving or being 25X1B  
 parked in the military posts included jeeps [ ]  
 with drivers wearing black-bordered blue epaulets, truck [ ]  
 the cantonment, and truck [ ] and tank truck [ ] with 25X1B  
 drivers wearing black-bordered blue epaulets in the camp on the edge of  
 the wood. 25X1B

1. [ ] Comment. It is believed that Deutsch Wagram airfield is still occu-  
 pied by a Soviet fighter regiment.
2. [ ] Comment. For sketches of two antenna systems, see Annex.
